### Alinari's Spacious Divino Penthouse Proves that Condominium Living

Sally Trout, owner of Sarasota's Sally Trout Interior Design, first notes the almost panoramic view created by the residence's open floor plan. The expansive sliding glass doors, which present the exceptional view, provide a focal point for surrounding furniture placement.

In addition to the view, Trout raves about Divino's versatility. For example, the living room could, instead, become the dining room, while furniture placement can further change the look.

"There are many possibilities here, with, easily six or seven ways to lay out the floor plan," she says.

"Residents have endless opportunities in creating their living space."

The residence's two-level floor plan was also a highlight for Trout, who praised both the flow of the upstairs and its many possibilities for use. "I love the two levels!" Trout says. "The additional living space has such potential. I see a cozy library or quaint reading space fitting there very nicely."

"This design is very well thought out," Trout says, "And adding personal touches can make for an even more comfortable and relaxed way of living."
